RATES AS REVIEWED October 2009 (Previous review 1.8.08)

Disclaimer

Spreadsheets were developed by industry, under the auspices of the Minister for Consumer and Employment Protection in December 2004 to assist Prime Contractors to negotiate with Sub Contractors in relation to safe sustainable rates. As part of this process it was recognized that fuel was an extremely volatile cost component and would need to be regularly reviewed. The figures above represent rates for "typical" operations and there could be significant variations in rates required for sustainable operations depending upon a range of variables including kilometres travelled, fuel efficiency and loads. Fuel levies will vary significantly as they are based on percentage change for the cost of fuel against total operating costs which will vary from company to company. **In all instances the Prime Contractor and the Subcontractor are responsible for negotiating a rate in accordance with the Trade Practices Act.** Costing spreadsheets are available to members to support their negotiations.
